

Case Study

Project: Burscough Science College,
Lancashire

Product/System: Euro Polymers Warm Roof,
Built up Felt System

Size/Value: 4,000m²

The works to Burscough Science College involved the application of 120mm insulation and a two layer, bituminous membrane, offering a 25 year guarantee

The project was carried out partly in the school holidays and partly during term time; close co-ordination with the school being required to enable the works to continue even during the exam period with minimum disruption to pupils and teaching.

The finished result looks fantastic, giving the school a waterproof, fully insulated roof for years to come.
